

Pharos Cloud Education Edition™

Redefining Print Management for Higher Education

Higher education institutions face challenges with traditional printing methods, including operational inefficiencies, rising costs, and strain on IT resources. Pharos Cloud Education Edition redefines print management by leveraging cloud technology to streamline operations, enhance security, and improve the printing experience for students and faculty.

Tailored to the unique needs of higher ed, our solution eliminates on-premises print infrastructure to improve IT efficiency and lower costs, while ensuring compliance with the highest security standards. Pharos Cloud Education Edition responds to the dynamic nature of educational environments, ensuring institutions can quickly adapt as needed.

- **Streamline operations.** Simplify day-to-day print operations by eliminating print servers.
- **Enhance security.** Protect sensitive data and ensure privacy with a secure platform that supports zero trust principles.
- **Improve printing experience.** Provide convenience and flexibility with an intuitive printing experience that reduces training requirements and support inquiries.
- **Optimize cost management.** Achieve savings and promote responsible printing with effective cost control.
- **Enable seamless integration.** Integrate and support existing systems and applications with an open API.

“We work with many different vendors and Pharos is by far the best to work with in a higher education environment.”

— Southeastern University

Advanced Solutions for Modern Print Management

Cloud-Based Management

Centralize your printing environment via our web console, eliminating on-site print servers and simplifying campus-wide print operations. Our cloud-native platform ensures top-tier security, scalability, and reliability, with continuous innovation through regular updates.

Robust Security

Protect your print environment and stay compliant with an ISO 27001 certified platform that supports zero trust security principles and protects data with end-to-end encryption.

Simplify Driver Management

Ensure a consistent printing experience across all manufacturers with our universal driver built on the IPP Everywhere standard. Manage fewer drivers by deploying our IPP Everywhere driver to most users, and manufacturer drivers to only those that need them.

Open API Integration

Leverage our open API for seamless integration with existing systems and applications.

Cost Management Tools

Enable users to allocate and charge back costs to departments, grants, or their own personal account, and set quotas to hold users accountable for their printing. Our advanced analytics also offer insights to optimize the print environment and identify cost-saving opportunities.

Secure Release

Enhance document security and reduce waste with a secure, pull-print workflow that requires owner authentication to release submitted print jobs. This conveniently allows users to submit print jobs across networks from workstations, laptops, Chromebooks, and mobile devices—and release them at any convenient secured printer.

Transforming Higher Education with Pharos Cloud

Pharos Cloud Education Edition combines the user management and cost recovery features required by higher education institutions with enterprise-level security, scalability, and reliability. Our cloud-native PrintOps platform empowers institutions to streamline print operations, boost IT efficiency, and optimize printing costs while meeting the demands of modern education environments.

Transform your higher education institution's print environment with Pharos Cloud Education Edition. Discover more today!
